(57) Claim

1. An improved vehicle cargo area liner adapted to overlie the exposed fixed inner walls of a vehicle tray or cargo area, said liner including:-
  - a base wall;
  - a side wall;
  - air flow passage means which opens to the exterior of said base wall and/or side wall; and
  - air intake means communicating with said air flow passage means and disposed so as to co-operate with the air stream created by the vehicle's movement whereby an air flow is induced through said air flow passages to sweep the surface of the inner walls of the vehicle tray or cargo area and inhibit build up of moisture.
